

I would like to make my opinion known with respect to the matter of Proceeding 02-230: I am opposed to the government regulation of digital broadcasts. I feel that if the Federal government is permitted to mandate compliance with a "copyrighted material" flag on broadcasted content, the government will be preventing consumers from using content in non-infringing ways. Passing Proceeding 02-230 will set up a dangerous precedent for government involvement in content controls for Televisions, Radios, Personal Computers and a vast array of communication devices.
